this collection argues that the romanticized conflation of childhood and innocence in american culture has been on a steady decline at least since the 1960s largely due to postmodern critiques of overarching narratives involving both the child and the

innocence of childhood additionally this collection highlights and analyzes examples of children's literature and culture throughout the 20th century and into the 21st which pointedly defy traditional idealized notions of childhood such an analysis serves to reiterate the idea that the romanticized notion of childhood which has pervaded american culture for over two centuries is little more than a cultural construction that bears little to no resemblance to the actual lived experience of american children

memorable children's narratives immerse readers in imaginary worlds that bring them into the story some of these places have been constructed in the real world like pinocchio's tuscany or anne of green gables prince edward island where visitors relive their favorite childhood tales theme parks like walt disney world and harry potter world use technology to engineer enchanting environments that reconnect visitors with beloved fictional settings and characters in new ways this collection of new essays explores the imagined places we loved as kids with a focus on the meaning of setting and its power to shape the way we view the world

tracing the industrial emergence of transmedia storytelling typically branded a product of the contemporary digital media landscape this book provides a historicised intervention into understandings of how fictional stories flow across multiple media forms through studies of the storyworlds constructed for the wizard of oz tarzan and superman the book reveals how new developments in advertising licensing and governmental policy across the twentieth century enabled historical systems of transmedia storytelling to emerge thereby providing a valuable contribution to the growing field of transmedia studies as well as to understandings of media convergence popular culture and historical media industries

kolbenschlag believes that modern social and economic conditions have changed every aspects of the american dream except the dream itself she delves into the the wizard of oz to help describe america as a nation of spiritual orphans dorothy who is lost in oz becomes the symbol of alienation and of expectations and deprivation she shows how most people in the united states discover that they are orphaned in many ways by family of origin by the gender class and culture in which they are socialized by systems and institutions and by traditional belief structures kolbenschlag argues that myths tell us truths about our experience and stresses the need to know and accept the inner orphan and bring together the apparently opposite goals of community and individuality isbn 0 06 064768 x 16 95
